

The New Standard in Productivity

The DS-180i folder inserter makes operational excellence a reality for your mail processing needs.

Its modular design supports the widest range of mailing applications - from direct mail campaigns to highly sensitive mailings including medical billing, payroll and financial statements; the DS-180i has the features and technology to meet the demands of your business with ease.

The New Standard in Productivity

Enhance the productivity of your mail assembly process with the DS-180i. Its speed is achieved by increased internal processing enhancements and well-balanced input and output capacities. Every mail piece is recorded for complete, detailed and accurate reporting of your mail production.

Automate and simplify the final step of your mail processing to further maximize productivity. The DS-180i optional output sorting capabilities and Postage Meter Interface eliminate manual tasks, which are time consuming and prone to human error.

The DS-180i offers a range of features to meet a new standard in productivity for your business.

Ease-of-Use and Intelligence from Start to Finish

The large 22" graphical interface IMOS reaches new heights in user friendliness and job programming. While programming the job, the system suggests how to load the machine for optimal performance.

Once the job has been programmed, simply select your job and you'll be up and running in no time. Changing over to completely different jobs just takes minutes.

To ease the learning, the user interface contains context-sensitive help on every screen. Furthermore, to maximize system uptime, the user interface features Remote Assistance enabling Neopost support specialists to connect to the system.

1. Insert Feeder

Feeds business reply envelopes and inserts up to a thickness of 4mm.

2. Reading Insert Feeder

Provides ability to use the insert feeder with matching applications.

3. Double Insert Feeder

Compact solution for multiple inserts or double the capacity.

4. Feeder Folder

For customer applications with documents requiring different fold types.

Modularity

The DS-180i can be customized to process your applications with a choice from five different modules. Insert feeders can process up to 4 mm booklets. The system enables up to eight modules providing 17 feeders.

The Feeder Folder enables different folded sets into one envelope. Applications requiring matching between the documents or inserts can be achieved by using the reading version of these modules.

Maximize Productivity

The DS-180i delivers optimum practical speed with the Productivity Pack.

- High processing speed (up to 5,500 envelopes per hour)
- Fast multi-sheet collation (up to 4,700 envelopes per hour for two sheets collated)

5. Flex Tower Folder

Can be configured with one to three stations for maximum flexibility.

5

Flexible Document Feeding

The Tower Folder comes in three feeder configurations to suit individual needs:

- 3 x 500 sheet feeders
- 1 x 500 sheet and 1 x 1000 sheet feeder
- 1 x 1000 sheet feeder

For secure feeding of a wide variety of printed paper, the feeders use mechanical double detection.

Each tower can read both paper sides for maximum compatibility with existing applications.

Each scanner supports OMR, BCR and 2D Data Matrix reading types.

The barcode location is automatically detected from the first sheet read.

Output Processing

The DS-180i provides multiple output options to further optimize costs and efficiency.

Envelopes can be sorted up to three directions based on criteria including weight, destination or type of output processing.

To optimize the workflow, a mailing system can be put in-line. Any mail which should not be metered can easily be diverted using the output sorter.
